

# Engineered with INTELLIGENCE

An in-depth look at the EWR-40M2

## 3-Point Serviceability:

Designed with improved serviceability in mind, access points on console panel, front panel, and toe panel simplify maintenance.

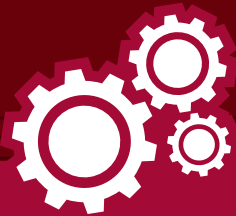

Hinged, front-panel design eliminates the need to remove the entire console when servicing.

Front panel provides easier access to door lock.

Toe panel provides optimal access for installation and service.

## Inverter-Driven Motor:

Measures performance, monitors motor limits and effectively balances loads to ensure maximum water extraction during final spin.

## Robust A-frame Design:

Robust A-frame design provides excellent strength and stability as a result of heavy-duty, channel iron construction.

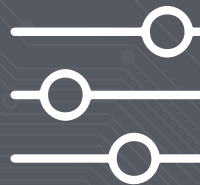

## Stainless-Steel Cabinet:

Protects against corrosion and enhances machine's longevity.

## Intuitive Micro Controls (IMC):

Programmable microprocessor controls that are customizable and easy to use.
