

# PRECISE CONTROL

FOR CUSTOMIZED CLEANING

Exploring MP2 Controls

## Help Protect Linen Investments:

Sophisticated controls provide the ability to carefully adjust water levels, specify temperature, and tumble RPMs to a more precise setting, helping to protect the quality of linens and save on utilities.

Water level can be fine-tuned to fit specific loads

Customizable cycles allow for water temperatures to be tailored to the specific needs of the load

Tumble RPM and the motor on/motor off time can be set to desired load need

**99**  
Possible  
Cycle Options

**16**

pre-programmed cycles provide easy selection choices

+

**83**

cycles can be programmed to fit facility needs such as sanitization or allergen removal

### LARGE SCREEN

A large screen with a simplified user interface makes for better visibility and easy navigation, helping to increase productivity.

### CYCLE/ERROR CODE

A log of error codes can be accessed to help identify machine issues quickly and help minimize downtime for efficiency.

### THERMAL STOP

Activating this feature ensures the cycle time won't start until the programmed temperature has been reached, helping to guarantee the wash cycle is correctly completed.

### WET CLEANING OPTION

An alternative method to traditional dry cleaning, this option delivers professional cleaning results with less impact on the environment.
